

[Between us, ideas become reality.®]

Before TechZone Ceiling System

no commercial interruptions

Now you can zone out the random clutter of technical services. The TechZone™ Ceiling System organizes lighting, diffusers and sprinklers into compact 6" technical zones. This innovative integration of function and design provides a custom, monolithic, uncluttered ceiling visual using large-size Optima™ ceiling panels to create the field. And because it's a system of standard components that have been pre-qualified for fit and finish, you avoid the long lead times, design incompatibilities and other hassles associated with custom ceiling systems. With TechZone, reality won't interfere with your design.
